CHEST X-RAY REPORT

Patient Name:	_____	Age / Sex:	_____
Patient ID:	_____	Date:	_____

Examination: Chest X-ray (PA View)

Clinical History: Fever, cough, breathlessness

Findings:

- Patchy consolidation seen in the right lower lung zone.
- Increased bronchovascular markings.
- Costophrenic angles are clear.
- Cardiac silhouette appears normal.
- No pleural effusion or pneumothorax detected.

Impression: Radiological features suggestive of **Pneumonia (Right Lower Lobe)**.

Advice: Clinical correlation advised. Follow-up chest X-ray if required.
